

Dataset

Name: A–Z Handwritten Alphabets (CSV format)

Link: <https://www.kaggle.com/datasets/sachinpatel21/az-handwritten-alphabets-in-csv-format>

Source: Published by Sachin Patel on Kaggle, derived from the NIST handwritten character database.

Description

- **Number of images:** 372,451 (one image per CSV row)
- **Number of classes:** 26 (capital letters A–Z)
- **Image type:** 28×28 grayscale, single channel
- **Format:** a single CSV file with 785 columns and no header row.
- Column 1 = label (integer 0–25, where 0 = A and 25 = Z)
- Columns 2–785 = flattened 28×28 pixel values (0–255)
- **Class distribution:** heavily imbalanced. The most common letter (O) has 57,825 images, while the least common (I) has only 1,120 — roughly a 50-to-1 gap.

Note

The dataset is **not** stored in this repository because of its size (about 700 MB uncompressed).

Download it from the Kaggle link above, or add it directly to a Kaggle notebook using **Add Input** → **search "A-Z Handwritten Alphabets in CSV format"**.
